Expert warns of upcoming solar panel waste surge in Türkiye

"About 90% of a panel can be recycled," Hiz stated, highlighting the need for effective waste management strategies. He noted that while the initial installed capacity of solar energy modules in Türkiye was between 230-250 watts, current averages have increased to about 450 watts, leading to concerns over the future of decommissioned panels.

Türkiye officially launches Europe's largest solar power plant

The plant, whose installation was launched in early 2020, covers an area of 20 million square meters and is situated in an area with the highest solar exposure. The solar panels in the facility come from Türkiye's first integrated solar ingot-wafer-module-cell production factory in Ankara, which was established by Kalyon Solar Energy
