Uganda macse bess

Overview

What is a 100% MACSE strategy?

A 100% MACSE strategy exposes BESS assets to merchant upside on just 20% of MSD margins. There is substantially more value upside available from wholesale market arbitrage. Access to energy arbitrage upside value via different BESS models is a key strategic decision for investors.

What is the MACSE auction?

The MACSE auction will provide 15-year contracts for energy storage projects whereby they will be paid annual premiums to cover operating costs in exchange for making their capacity available on the Dispatching Services Market (acronymised in Italian as MSD). It will be led by transmission system operator (TSO) Terna.

How will MACSE tender targets affect Bess investors?

MACSE tender targets will adapt to the zonal need for storage, but market inefficiencies in predicting fundamental value drivers (e.g., RES buildout, lack of flexibility, interconnection constraints) will likely create locational merchant upside for BESS investors.

Will MACSE competition be 'fierce'?

Consultancy Timera Energy recently said competition in the MACSE auction will be "fierce", and suggested BESS operators maintain a merchant tranche of their project to offset potentially lower returns on the MACSE contracted tranche.

What is MACSE policy support?

The catalyst for this is the implementation of the new MACSE policy support mechanism, offering 15 year indexed contracts on up to 100% of asset capacity. MACSE is a game changer. 15 year contracts provide key downside risk protection for infrastructure investors.

What will MACSE do in 2025?

Much larger projects are expected to come online in the next few years, driven by MACSE. Image: Trina Solar. Minister of the environment and energy security Gilberto Pichetto has signed a decree allowing Italy to proceed with its energy storage capacity auction, known as MACSE, in the first half of 2025.

Italy has unique opportunities in energy storage

With three different technology providers on the panel, it made sense to unpick the topic of technologies for the auction too. The MACSE auction has stipulated that 90% of the funding will go to either lithium-ion battery energy storage system (BESS) or pumped hydro energy storage (PHES), with 10% allocated for 'other technologies'.

Stoccaggio, Pichetto firma il Decreto sul MACSE di Terna

Con queste parole il ministro dell'Ambiente e della Sicurezza Energetica, Gilberto Pichetto, ha dato il via libera alla disciplina sul MACSE di Terna. L'acronimo sta per "Meccanismo di Approvvigionamento di Capacità di ...
