I'm curious of the advantages of a 48V system over a 24V.

48V system

I was thinking of a 24V system however, it seems all the energy companies are pushing the 48V system and it does seem to be the direction things are going and the pricing seemed great. The above system seems good enough to power my 24' bus for one or two people living fulltime. I did want to keep the bus power and solar systems separate.

What Are the Advantages of a 48V Solar System? , Redway Tech

A 48V solar system offers several advantages over lower voltage systems, including improved efficiency, reduced energy loss, and greater scalability. These benefits make it an ideal choice for both residential and commercial applications, allowing users to maximize their energy production and storage capabilities. When should you go with a 48v system instead of 24v? : ...

The 24V system is also likely easier to expand, as you only need to buy 12V batteries in pairs vs getting four at a time for the 48V system. Like others have said, the higher the voltage the "better" the system is in terms of efficiency, but if you have to pay a hefty premium for it over a 24V system then you might be better off spending the
