## Overview

---

Who is batrec Industrie AG?

Batrec Industrie AG was founded in 1989. The Company's line of business includes the recovering of nonferrous metals and alloys from new and used scraps.

Who is batrec?

We are a subsidiary of the VEOLIA group, part of SARP Industries, the European leader in the treatment and recycling of hazardous industrial waste. BATREC is your partner to give a second life to your waste. We process batteries, mercury-contaminated wastes, liquid mercury and mercury absorbents for customers around the world.

How did batrec Industrie start?

The company's operations began in 1989 with the recycling of household batteries. At the time these contained considerable quantities of mercury, and as such Batrec Industrie acquired significant knowledge in handling this material.

Why did batrec Industrie build a new catalyst recycling plant?

In order to accommodate the clear demand in the market for such services, at the end of 2011 Batrec Industrie built a new catalyst recycling plant, which is currently running two furnace lines handling 1000 tonnes of catalyst and 3000 tonnes of active carbon.

All BATREC's teams are trained in safe working practice supported by a behavioural safety programme. Our operational safety system is regularly tested and, when necessary, modified. All possible protective measures are continuously applied to reduce the risk of accidents and

exposure that may be harmful to health.

## Project management

BATREC has carried out a wide range of projects throughout the world involving different types of mercury waste, activated carbon, mercury absorbents and batteries. To illustrate our global expertise, we provide the following case studies.

## Batrec Industrie AG

Batrec Industrie AG (PLC) is a globally active recycling company with premises in Wimmis (Switzerland) that specialises in the economical, environmentally-friendly and sustainable disposal of hazardous waste, in particular batteries and mercury. The highest quality, safety and environmental standards are central to our work

## Battery recycling

BATREC's processing unit can recycle any type of cell and battery. Alkaline, Zn-air, Zn-C batteries as well as button batteries. Alkaline, Zn-air, Zn-C batteries as well as button batteries. In addition, we can process Lithium batteries (eg LiMnO<sub>2</sub>) or Li-ion batteries (Phones, E-bikes, electric vehicles, electric tools).

## Basel Convention, waste disposal

The management of hazardous waste has been an environmental concern of the international community since the early 1980s, when it became one of the three priority areas of the first Program for the Development and Periodic Review of Environmental Law (Montevideo Program) of the United Nations Environment Program (UNEP) in 1981.

## Read about BATREC

In 2013, BATREC officially joined VEOLIA as part of SARP Industries. SARP Industries is specialised within the Veolia Group in the treatment of hazardous waste. SARPI is present in 6 geographical areas and treats more than 46 million tons of hazardous waste per year.
