Uzbekistan green life energy solutions

Overview

Will Uzbekistan develop a green hydrogen hub?

February 29, 2024, Tashkent, Uzbekistan –Today, the United States Agency for International Development (USAID) introduced a new initiative to support Uzbekistan’s clean energy objectives – the development of a Green Hydrogen Hub. Green hydrogen is defined as hydrogen energy developed by using renewable energy resources.

Is Hydro a viable energy source for Uzbekistan?

Hydrogen is emerging as one of the leading options for storing and potentially transporting energy from renewables over long distances. Uzbekistan set a 25 percent target for renewable energy (solar, wind, and hydro) generation by 2030 and carbon neutrality by 2050.

What is Uzbekistan's Energy Hub?

The Hub will help improve the energy sector workforce’s expertise in emerging clean energy technologies to shape the region’s future energy landscape and contribute to Uzbekistan’s “Strategy for the Development of Renewable and Hydrogen Energy”.

What did Uzbekistan's Deputy Minister of energy discuss at a meeting?

During the meeting, the Deputy Minister of Energy of the Republic of Uzbekistan, Umid Mamadaminov, and Acting Director of USAID Mission to Uzbekistan Edward Michalski, alongside key stakeholders from the energy sector discussed the initial phase of the Hydrogen Hub concept, such as the priorities and action steps.
