Velocity energy batteri Indonesia

Overview

Will there be EV battery plants in Indonesia?

TEMPO.CO, Jakarta - Chairman of the Indonesian Electric Motorcycle Industry Association (Aismoli) Budi Setiyadi said that currently, there are three companies that stating their plan to build electric vehicle or EV battery plants in Indonesia. He said that the battery production could be started next year.

How much battery capacity does Indonesia have?

The Energy Shift Institute (Energy Shift) foresees that this year, Indonesia will hold less than 0.4% of global battery manufacturing capacity. In absolute terms, that capacity is just 10GWh out of the more than 2,800GWh the world has in total, not to mention the global figure is set to double by 2030.

Will Indonesia become largest EV battery producer in 2027?

Last year, state-owned Antara news agency published an article entitled "Indonesia to become largest EV battery producer in 2027: Minister".³ The headline was well in keeping with the government's persistent push of the nickel-to-EV narrative and its vow to place Indonesia as a dominant player in the global battery and EV supply chain.

Will EV battery plant reduce the price of electric motorcycles in Indonesia?

"Currently, there are 3 firms that plan to build EV battery plant," said Budi on November 11, 2023. According to Budi, the price of EV batteries is expected to be lower if they are produced in Indonesia. Therefore, it also will reduce the selling price of electric motorcycles, including the electric motorcycle conversion in the country.

How much battery capacity will Indonesia have by 2027?

Indonesia's capacity is also supported by other battery facilities, such as PT International Chemical industry's 100 megawatt-hour (MWh) plant.¹¹ By 2027, Chinese company Contemporary Amperex Technology (CATL) will probably

add 15GWh of capacity.12.

Why is Hyundai launching a battery plant in Indonesia?

Hyundai and LG Energy Solution have opened a \$1.1bn battery cell plant in Indonesia as the south-east Asian country works to build an electric vehicle ecosystem. The launch of the country's first battery plant on Wednesday is part of Indonesia's push to move up the global EV supply chain.
