

## Solar Energy South Africa

# Venezuela azelio energy storage

## Overview

---

What is Azelio's thermal energy storage technology?

Azelio's thermal energy storage technology stores energy in recycled aluminium and converts it into electricity and heat when needed with the help of a Stirling engine. The company said production of the novel product will initially be at a slow rate with plans for scaling up in 2022.

How long does Azelio's energy storage system last?

Azelio claims the technology can enable 13 hours' duration of electricity storage as well as provide heat on demand, is effective in hot or cold climates and has an expected system lifetime of 30 years.

What is Azelio's collaboration with Stena aluminium?

The collaboration with Stena Aluminium is a part of Azelio's preparations for volume production of its energy storage systems, which is planned to start in the third quarter of 2021.

What is Azelio & ALEC Energy doing in Abu Dhabi?

Azelio and ALEC Energy have a Memorandum of Understanding (MoU) in place for 49MW installed capacity of the thermal storage units, while ALEC Energy is also installing an Azelio unit as a verification project in Abu Dhabi together with clean energy developer Masdar and a local university.

What is Azelio doing in Morocco?

Azelio has signed a number of Memorandum of Understanding (MoU) documents with partners in countries Mexico and commissioned its first grid-scale system in Morocco late last year in partnership with the Moroccan Agency for Sustainable Energy (MASEN).

Why did Azelio choose aluminium?

Since the greatest energy recovery is obtained in the conversion phase, Azelio has chosen an aluminium alloy for its very specific phase changing characteristics. Aluminium has excellent heating storage ability.

### **Azelio's energy storage technology shown to be significantly ...**

The climate impact of Azelio's energy storage system (TES.POD) is significantly less than that of lithium-ion battery storage and dramatically less than that of diesel generators. This is concluded in a Life Cycle Assessment made by the Swedish research institute RISE to determine Azelio's TES.POD's global CO2-equivalent emission during its entire lifetime.

## Azelio Starts Production of its Energy Storage TES.POD

Production in volume design of Azelio's long-duration energy storage TES.POD has started according to plan. To ensure high quality in both the product and the supply chain, consisting of around seventy European suppliers, production will begin at a low pace before scaling up to high volumes in 2022.

## Azelio: Energy Storage with Alu PCM + Stirling Engine

Hopefully the efficiencies of an Azelio type thermal energy storage system can drive down costs to become a competitive market player. The need is certainly there. SageBrush REJECT Fascism. May 7, 2015 14,941 21,784 New Mexico. Aug 19, 2020 #8 Aug 19, 2020 #8 iPlug said: Would be a welcome renewable energy storage addition if it can find a cost

## TEXEL Acquires Thermal Energy Technologies from Former Nasdaq-Listed AZELIO

In addition to the Stirling engine technology, TEXEL has also acquired the full developed thermal energy storage technology from Azelio, broadening the company's technological portfolio.
