

## Solar Energy South Africa

# Warwick Solar Power Plant

## Overview

---

Warwick Solar PV Park is a 78MW solar PV power project. It is located in Queensland, Australia. What is the Warwick solar farm?

The Warwick Solar Farm utilises low impact solar photovoltaic technology to generate around 160,000 MWh of clean energy every year. Above: UQ Vice-Chancellor Professor Peter Høj, Minister for State Development, Tourism and innovation Kate Jones and Minister for Natural Resources, Mines and Energy Anthony Lynham.

What is the UQ Warwick solar farm?

The UQ Warwick Solar Farm will enable UQ to be 100% renewable by 2020. This means the solar farm will generate as much or more electricity each year than the University needs. The project will provide the groundwork for a wide range of new teaching, research and engagement opportunities, in addition to its environmental and financial benefits.

Will a giant solar farm power 14500 homes in Warwickshire?

A giant solar farm that will power 14,500 homes in Warwickshire has narrowly won planning permission. About 89 hectares of farmland near Harbury and Ufton are set to be covered by solar panels for up to 40 years. A vote by Stratford-on-Avon District Council's planning committee was tied at three all, with a seventh councillor abstaining.

How many solar panels does Warwick need?

While 64MW may seem small in the scheme of Australian solar farms, Warwick boasts 204,540 solar panels, which are anticipated to generate 160,000 megawatt hours per annum, or enough to power 25,000 homes. That's nearly five times as much as the town of Warwick would need, according to the 2016 Census.

When will Lendlease build a solar farm in Warwick?

Lendlease was appointed to design and construct the 154 hectare solar farm which is located at Sladevale, about 5km north of the Warwick town centre. Lendlease have been on site since mid-February 2019 and construction work began in April 2019. Completion is expected in early 2020.

Will CS Energy buy Warwick solar farm?

CS Energy has signed an offtake agreement to purchase a proportion of the renewable energy produced at the University of Queensland's 64 megawatt Warwick Solar Farm. Energy generated by the project is used by UQ to offset its own energy needs, with any surplus being sold into the market - a portion of which will now be supplied to CS Energy.
