No container design  
flexible site layout

Cycle Life  
**≥8000**

Nominal Energy  
**200kwh**

IP Grade  
**IP55**

## Overview

---

Roof Type  
1. Thatch roofs: As there is an increased risk of fire.  
2. Roofs containing Asbestos: As this is a safety hazard for installation teams to work with.  
3. Glass roofs: As they are too fragile to support the solar panels and fixings.  
Can solar panels be installed on all roof materials?

While solar panels can usually be safely and effectively installed on all roof materials, the exact installation processes may differ. As such, there is no "best" roof for solar – panels can go on just about any roof material. Below, we'll look at the various roof materials and how installers secure solar panels to each.

Which roof is best for solar panels?

No one type of roof is best for solar panels – mounting solutions exist for just about every roof out there. Some roofs will cost more to mount solar panels on. This is due to the different equipment installers need to use. Start comparing customized solar quotes today on the EnergySage Marketplace.

Can you install solar panels on a roof in the UK?

The majority of UK homes have a roof suitable for solar panel installation. Great news for anyone looking to generate their own renewable electricity. If you'd like to speak to an MCS certified (or equivalent) solar installer for advice – you can get free no-obligation quotes from up to 4 solar installers in your area using Solar Guide.

Can you install solar panels on a flat roof?

Ballast systems are simply a weighted racking setup that holds solar panels in place. If you need to drill into your flat roof to install solar panels, don't worry – your solar installer will ensure that the holes they drill are as small as possible and sealed correctly to avoid roof damage or leaking. Can you install solar panels on wooden roofs?

Can you put a solar panel on a thatched roof?

Thatched roofs are not suitable for solar panels. There's no mounting system designed for thatch, which wouldn't be ventilated well enough underneath the panels and so would rot. And given that thatched roofs already present a fire risk, putting an electrical system on top wouldn't be sensible!.

How many solar panels can be installed on a roof?

Your roof will need to be large enough to fit a suitable number of solar panels, as there's rarely much point putting just two or three panels up there. The average solar panel takes up 2m<sup>2</sup>, and your installer should leave around 40cm on each side of the array, as well as 3cm between every panel.
