Overview

What is a snapshot of global PV markets?

This 12th edition of the “Snapshot of Global PV Markets” aims at providing preliminary information on how the PV market developed in 2023. The 29th edition of the PVPS complete “Trends in Photovoltaic Applications” report will be published in Q4 2024.

How big is the global PV market?

After a year of market stabilization, preliminary reported market data shows a global annual PV market at a slightly higher level than 2018 and 2017. At least 114,9 GW of PV systems have been installed and commissioned in the world last year. The total cumulative installed capacity for PV at the end of 2019 reached at least 627 GW.

When will PVPS complete 'trends in photovoltaic applications' report be published?

The 26th edition of the PVPS complete “Trends in Photovoltaic Applications” report will be published in Q4 2020. In 2019, the PV market broke the 100 GW threshold for the third time in a row and the market grew 12% YoY.

Are PV market estimates valid?

are valid at the date of publication and should be considered as estimates in several countries due to the publication date. After a year of market stabilization, preliminary reported market data shows a global annual PV market at a slightly higher level than 2018 and 2017.

How did the global PV market perform in 2019?

Asian markets represented around 57% of the global PV market in 2019, a significant decrease compared to levels experienced in previous years. In the Americas, the market increased slightly, mainly through the US market which experienced accelerated growth (13,3 GW) in 2019.

Why did the PV market grow 12% yy in Q4 2020?

Q4 2020. In 2019, the PV market broke the 100 GW threshold for the third time in a row and the market grew 12% YoY. This growth follows a year of stabilization and is explained by the significant market increase in all continents, which global effect has been partially hidden by the slowdown in China, the world market leader in PV installations.
