Where is the Luhu wind power station built

Overview

Lussa Hydro-Electric Scheme is a small-scale hydro-electric power station, built by the North of Scotland Hydro-Electric Board and commissioned in 1956. It is located near Peninver on the Kintyre peninsula, part of Argyll and Bute in Scotland. It was originally designed to supply power to Campbeltown, but is now.

It was created by the Hydro-electric Development (Scotland) Act 1943, a measure championed by the politician while he was Secretary of State for Scotland. Johnston's.

The surface level of Lussa Loch is 430 feet (131 m) above (AOD), it covers 0.46 square miles (1.2 km²), and drains an area of 10.64 square miles (27.56 km²). Strathduie Water flows into it from the north, and that collects water from many.
