Where to report the installation of photovoltaic panels

Overview

You must notify your local DNO if you make any significant change to your connection, such as installing one of the following energy devices: 1. solar photovoltaic (PV) 2. heat pump 3. electric vehicle (EV) charge point 4. battery storage .

In England and Wales, if you are an installation contractor carrying out any work to which building regulations apply, you have a responsibility to ensure that the work complies. The energy device owner may also have a.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Who should check the roof structure of a solar PV system?

5.9.4 The MCS Contractor shall ensure that the roof structure is checked by a suitably competent person to ensure it can withstand the loads imposed by the solar PV system. 5.9.5 For the typical roof structure types shown in Table 1, the calculation methodologies given should be used. qualified structural engineer shall be consulted.

When did solar panels become a building regulation?

In 2005, household electrical work was absorbed into the UK government's official Building Regulations. A year later, the Climate Change and Sustainable Energy Act 2006 brought microgeneration systems like solar panels under the umbrella of the Building Regulations. Should you receive a building

regulations certificate for your solar panels?

.

How do I connect my solar panel system to the electrical grid?

To connect your solar panel system to the electrical grid and benefit from the Smart Export Guarantee (SEG), you will need to speak with your local District Network Operator (DNO). If your solar panel installation involves work on a shared or party wall, you may need to comply with the Party Wall Act.

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.
