

## Solar Energy South Africa

# Why not install photovoltaic panels in every household

## Overview

---

Why solar panels are not worth it for all homeowners

1. Your roof isn't suitable for solar panels Home solar panel systems are nearly always placed on the roof. Most roofs possess the two necessary ingredients for solar panels: lots of sunlight and a surface to mount them on.
2. There's nowhere else to put solar panels .
3. Your electricity costs are already low .
4. You plan to move or sell your home .

Should solar panels be installed on new homes?

Realistically, if solar panelling is the way we are heading in the UK, this needs to start with new builds. It is vastly cheaper to install solar panels on a new property that it is to fit them retrospectively after a family moves in.

Should you buy a home with solar panels?

When a home already has solar panels it has an excellent selling point. When you move into a property with solar panels, you really begin to notice the benefits. Solar panels mean that a household can enjoy certain parts of the year being completely self-powered, meaning there should be a significant reduction in their energy bills.

Does a household use solar PV?

Panos and Margelous suggest that a household's ability to efficiently use energy generated from solar PV also plays a role in adoption. Komatsu et al. conducted a study in Bangladesh and found that households with installed batteries are more likely to use solar PV as it can provide the opportunity to store energy for later use. 3.2.7.

Is it cheaper to install solar panels on a new home?

It is vastly cheaper to install solar panels on a new property that it is to fit them retrospectively after a family moves in. Having mandatory requirements for solar panels on new homes means that installation costs are lower and homeowners can save money as soon as they move in. Can a home run entirely on solar power?

Are all new build homes built with solar panels a requirement?

Yet, the government realises it is already way off target. A question we could ask is why aren't all new build homes built with solar panels as a requirement?

If new build homes had solar panels and the ability to store energy in batteries, the country would certainly benefit from a reduction in emissions of carbon dioxide.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.
