Overview

Who owns a 50 MW wind power plant in Namibia?

WINDHOEK, April 18 (Xinhua) -- Namibia's power utility, NamPower, and CERIM Luderitz Energy, a joint venture between Energy China and locally owned Riminii Investments, on Monday signed power purchase and transmission connection agreements to develop a 50 MW wind power plant in the coastal town of Luderitz, southwestern Namibia.

What is first generation wind?

First generation follows the installation of the first of the project's 90 wind turbines in January 2021 and the successful energisation of the project's transmission system including the offshore substation platforms, offshore export cable, onshore cables and onshore substation.

Who takes the electricity from Namibia's power plant?

The Namibian Power Utility will be the sole off-taker of the electricity generated from the power plant for the duration of the 25-year PPA term. Namibia faces a power deficit and currently relies on imports from its neighbors South Africa, Zimbabwe, and Zambia, for approximately 60 percent of its electricity supply.

Does the Triton Knoll offshore wind farm generate renewable electricity?

The Triton Knoll Offshore Wind Farm has successfully generated renewable electricity for the first time.
