What are solar panels brackets & how do they work?

These brackets provide a secure and adaptable framework for attaching solar panels to various surfaces, be it rooftops or ground structures. With their durable construction and easy installation, they ensure optimal panel positioning, maximising energy production for sustainable power solutions.

How to install a solar panel bracket?

To install a solar panel bracket, apply adhesive to the upper side of the bracket (this is where the solar panel will be positioned). Position and press firmly the side bracket along the side of the solar panel and repeat this process with the other side bracket. Allow the adhesive to dry as per the product specifications.

How many watts can a solar panel fit in a bracket?

Please note that this bracket can accommodate up to a 150W solar panel. For brackets rated between 20W and 80W, align the short edge of the solar panel to the top edge of the bracket (Figure 3). For solar panels rated between 100W and 150W, align the long edge of the solar panel to the top edge of the

bracket (Figure 3). 5.2. Mounting options.
